Many eye injuries occur when glasses are lifted to get a closer look – that's why **clarity of vision** through your protective eyewear is crucial. Keep them on throughout the job!

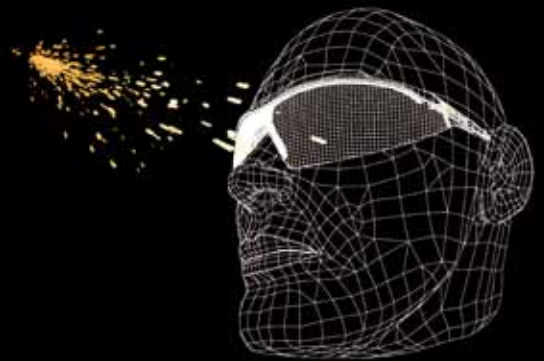

Cat safety eyewear eliminates the reasons why you'd remove the frame. Anti fog coatings and ventilation systems, anti scratch and easy clean are all features that **enhance your visual experience**. Single hand lens angle adjustment means you don't have to remove the frame to alter the inclination.

As **a frame is only as good as its fit** and no two faces are alike, Cat frames are ergonomically **designed to flex-fit your individual facial shape**. Temple lengths and angles can be **individually adjusted**, and snap lock into position for security.

Cat frames offer **optimum protection**. Polycarbonate lenses provide the ultimate ocular shield, locked in three directions to **resist impact** from front or side. Frame materials are tested to resist chemicals and impact from particles.

Cat has the **comfort and style** angle covered too. Looking good and feeling good in your eyewear increases wearability. Flexible materials offer a **pressure-free fit for continuous wear**. Tips and bridges are non-slip. Frames are lightweight.

Engineered to the core for total comfort, optimised reaction times and better risk assessment. Your clear vision ensures reduced risk of injury.

Cat protective eyewear meets and exceeds the following international standards for quality and safety:

CE EN 166:2001
ANSI Z87.1:2003

anti fog	yes	yes	yes	yes	no	yes
anti scratch	yes	yes	yes	yes	yes	yes

The standards scientifically prove that all Cat frames:

- Withstand extreme pressures of heat and cold
- Resist mass impact at velocity
- Shield against chemical splash
- Provide excellence in optical quality including resilience to UV and other harmful rays

The eye is a fragile organ – a small fleck of dust can cause conjunctivitis, a solid particle at high speed can cause a perforation of the eye, the detachment of the retina, or permanent loss of sight.

Acute irritation of the eye and burns from chemicals and solvents can also cause partial to total loss of sight.

In the UK, the department of Trade and Industry reports 120,000 accidents involving eye injuries every year. In the US 1,000 work-related eye injuries occur every day. Over 10% of these result in a missed day of work. The majority of these come from foreign objects, blows, chemicals and cuts to the eye – which are all preventable by wearing the correct safety eyewear.

GLOVES

**12205 PREMIUM DEER**

- Material Content: 55% Deerskin, 45% Spandex®
- Sizes: Large
- Premium deerskin palm
- Shirred elastic wrist
- Durable padded palm and reinforced thumb providing excellent shock absorption
- Breathable Spandex® back
- Double stitched index finger
- Meets safety standard CE EN 388 (3243)

**12213 NEOPRENE COMFORT**

- Material Content: 40% CLARINO®, 55% Neoprene, 4% Nylon, 1% Silicone
- Sizes: Large
- Water resistant neoprene
- Clarino® synthetic leather palm
- Ergonomic pre-curved fingers
- High visibility reflective piping
- Long wearing reinforced thumb
- Silicone finger grips offering superior traction and grip
- Durable padded palm providing excellent shock absorption and wear
- Adjustable reflective wrist strap
- Meets safety standard CE EN 388 (1231)

**12211 MECHANIC**

- Material Content: 50% CLARINO®, 35% Spandex, 13% Neoprene, 2% Nylon
- Sizes: Large
- Clarino® synthetic leather palm, durable and padded offering excellent shock absorption and wear
- Water-resistant neoprene on wrist and knuckles
- Long wearing reinforced thumb
- Adjustable wrist fastener offering secure fit
- Meets safety standard EN 388 (3121)

**12212 LIGHTWEIGHT MECHANIC**

- Material Content: 70% Clarino Synthetic Leather, 30% Spandex
- Sizes: Large
- Clarino® is a high quality microfiber suede. Lightweight, durable soft leather offering comfort, flexibility and breathability.
- Adjustable wrist fastener with Cat® logo.
- Black

**12215 PADDED PALM UTILITY**

- Material Content: 50% Synthetic Leather, 35% Spandex, 15% Nylon
- Sizes: Large
- Mesh/Spandex® back offering superior fit and comfort
- Durable padded palm with excellent shock absorption and wear
- Adjustable wrist closure ideal for secure fit
- Meets safety standard CE EN 388 (1121)

**12201 PIG SKIN**

- Material Content: Pigskin Premium Leather Palm, Spandex Back
- Sizes: Medium, Large
- Reversed pigskin palm & finger
- Adjustable wrist strap with Cat® logo
- Black

**12202 PIG SKIN FINGERLESS**

- Material Content: Pigskin Premium Leather Palm, Spandex Back
- Sizes: Medium, Large
- Half finger
- Adjustable wrist strap with Cat® logo
- Black

**13101 PREMIUM RIGGER**

- Material Content: 55% Leather, 45% Cotton
- Sizes: Large
- Premium grain leather palm and fingers
- Gunn cut design with wing thumb
- Breathable cotton back
- Shirred elastic wrist
- Rubberised safety cuff
- Meets safety standard CE EN 388 (3122)

**13201 RIGGER**

- Material Content: 55% Leather, 45% Cotton
- Sizes: Large
- Split leather cowhide palm and fingers providing excellent wear
- Gunn cut design with wing thumb
- Breathable cotton back offering superior fit and comfort
- Shirred elastic wrist giving safe, secure fit
- Rubberised Safety Cuff
- Meets safety standard CE EN 388 (4243)

**17416 NITRILE COATED PALM**

- Material content: 55% Nitrile, 45% Nylon
- Sizes: Medium, Large, Extra Large
- Breathable nylon shell
- Nitrile coated palm and fingers
- Adjustable wrist closure
- Meets safety standard CE EN 388 (3121)

**17410 THERMAL GRIPSTER**

- Material Content: Acrylic String Knit, Latex
- Sizes: Medium, Large, Extra Large
- Brushed lined acrylic
- Latex coated palm and fingers
- Cat® diesel power logo
- Knit wrist
- Meets safety standard CE EN 388 (2243)

**17400 LATEX PALM**

- Material Content: Cotton String Knit, Latex
- Sizes: Medium, Large, Extra Large
- Breathable poly/cotton blend
- Latex coated palm and fingers
- Cat® diesel power logo
- Knit wrist
- Meets safety standard CE EN 388 (2243)

**15401 CAMO JERSEY**

- Material Content: Cotton String Knit, Poly PVC Dotted Palm
- Sizes: Large
- Camouflage printed breathable cotton jersey
- Knit wrist
- Meets safety standard CE EN 388 (1111)

**15400 JERSEY DOTTED PALM**

- Breathable Heavy Cotton Jersey with PVC
- Sizes: Large
- Knit wrist
- Micro dot palm
- Black
- Meets safety standard CE EN 388 (1111)

**17408 HEAVY KNIT**

- Material Content: 55% Cotton, 45% Poly
- Sizes: Large
- Soft string knit glove for minimal risk

SOCKS

CAT CREW SOCKS

- 75% Cotton, 21% Polyamide, 4% Elastane
- Sizes: 6-11, 11-14
- High density heel and toe protection
- High Stretch Top
- Alignment Points
- Soft feel, durable fabric, warmth
- Assorted colours
- Machine Washable 40°
- 3 pair pack
- Black with Cat® logo

QUARTER CREW SOCKS

- 75% Cotton, 21% Polyamide, 4% Elastane
- Sizes: 6-11
- High density heel and toe protection
- Black with Cat® logo
- Heel and toe alignment points for correct fit
- Machine Washable 40°
- 3 pair pack

THERMO SOCKS

- 41% Cotton, 41% Acrylic, 15% Polyester, 3% Elastane
- Sizes: 6-11, 11-14
- Natural thermo regulating properties ensuring the foot is well insulated
- Fully cushioned foot base protecting the skin from friction and fluctuations in temperature
- Reinforced toe and heel for use with steel toe boots
- High stretch top for ease of wear with minimal compression
- Machine Washable 40°
- 2 pair pack
- Black/Grey

INDUSTRIAL WORK SOCK

- 76% Combed cotton, 22% Polyester, 2% Elastane
- Sizes: 6-11, 11-14
- Heavy duty boot sock
- High density heel and toe protection
- High stretch top
- Alignment points prevent sock movement
- Anatomical Y heel for improved fit
- Soft feel, durable fabric, warmth
- Extra resistant toe and heel for use with steel toe boots
- Comfort top with ANTI-SLIP in the leg
- Machine Washable 40°
- 2 pair pack
- Black with Cat® logo

EXECUTIVE WORK SOCK

- 77% Cotton, 22% Polyamide, 1% Elastane
- Sizes: 6-9, 9-11
- Comfort top with anti-slip
- Reinforced toe and heel for use with steel toe boots
- Handlinked toe for guaranteed comfort
- Black with Cat® logo
- 3 pair pack

DRESS SOCK

- 75% Cotton, 23% Nylon, 2% Elastane
- Sizes: 6-11
- 5 pair pack

SPORT CREW SOCK

- 70% Combed Cotton, 27% Polyester, 2% Lycra/Elastane, 1% Viscose
- Sizes: 6-11
- Available in Black or White
- High stretch top
- Machine Washable 40°
- 3 pair pack

TRAINER SOCK

- 70% Cotton, 24% Polyester, 1% Elastane
- Sizes: 6-11
- Available in Black or White
- Machine Washable 40°
- 3 pair pack

KIDS SOCK

- 77% Cotton, 21% Polyamide, 2% Elastane
- Sizes: 9-12, 12-2, 3-5
- Assorted Colours
- Machine Washable 40°
- 3 pair pack

SUPREMACY SBP

Upper: Oiled Full Grain Leather/Nubuck
Lining: Nylon Mesh
Sock Liner: Poliyou®
Midsole: Poured PU
Outsole: T816 Ultra Work Compound
Construction: Cement
Sizes: UK 6-12

- Conforms to safety standards ISO20345, Safety Category SBP
- Midsole and Toe Protection
- Waterproof
- Lightweight rubber/PU sole
- Moisture wicking internal membrane
- Inside zip fastening for ease of access
- Non clogging lightweight rubber/PU sole

Suitable for Heavy Industrial Occupations

Suggested Industries: Agriculture, Mansony, Mining, Petroleum, Railway, Road Construction, Steel Works, Utility Works

SUNDANCE

COLORADO

Upper:	Nubuck leather upper
Lining:	Cambrelle® lining
Midssole:	Rubber
Outsole:	Rubber
Sizes:	Black 6-12 Honey 3-12 Sundance 6-12

- Genuine Goodyear welt construction provides time proven strength and durability
- Padded collar for ultimate comfort and protection
- Speed lacing hook system at top of boot allows the wearer to tie laces with speed and ease

Cambrelle® is a high quality lining with superior strength. The bi-component fibres allow the lining to adapt to the motion of the foot. Microscopic air pockets provide air circulation whilst cushioning the foot. Effective at dispersing moisture, preventing staining and the build up of bacteria.

DARK BEIGE

HARDING

Upper:	Full grain leather upper
Sock Liner:	Ortholite® Footbed
Midsole:	EVA
Outsole:	Rubber
Sizes:	6-12

- Technology construction for superior comfort and durability
- Genuine Goodyear welt technique offers long lasting footwear
- Moulded EVA cushioning offers shock absorption and energy return
- Ortholite® footbed includes a microbial foam layer for odour control, wicking moisture to keep the foot cool and dry. Spring back technology gives long-term cushioning.

DARK BEIGE

CERTUS HI

Upper:	Full grain leather upper
Lining:	Nylon mesh lining
Sock Liner:	Removable EVA
Midsole:	EVA
Outsole:	Rubber
Sizes:	6-12

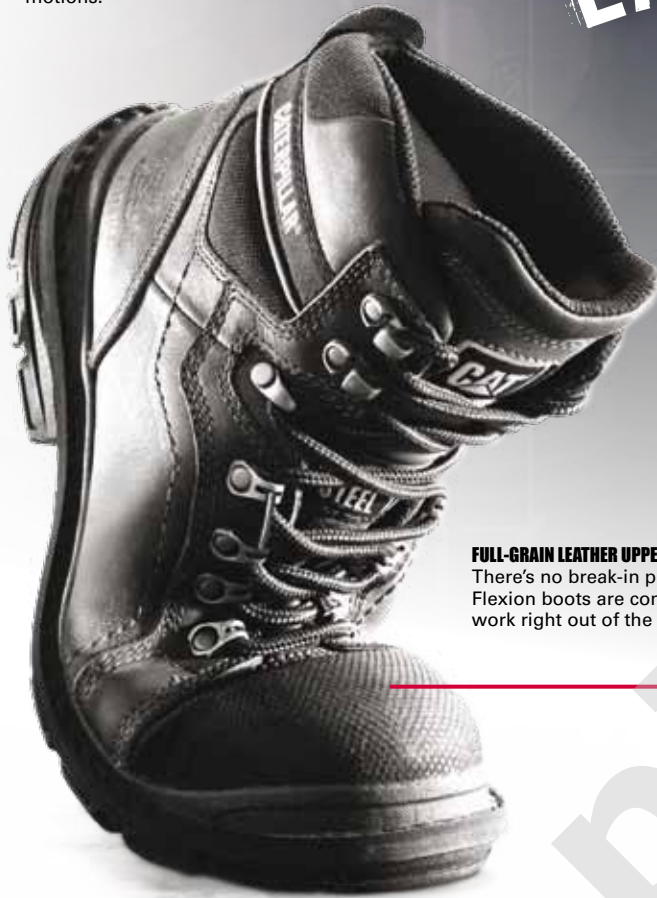

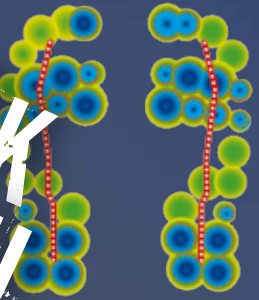

- Stylish and comfortable hiker
- Traction tread on sole gives a good level of slip resistance
- Padded collar for comfort and added ankle support
- Speed lacing hook system at top of boot allows the wearer to tie laces with speed and ease

FLEXION

ASYMMETRICAL UPPER DESIGN

Designed to work around the ankle bone, the upper has an asymmetrical topline and collar that includes an Achilles heel notch to enhance comfort during bending and flexing motions.

HARD AT WORK EASY ON YOU

Designed with the principles of ergonomic footwear design as its foundation, flexion allows workers to maintain stamina by supporting movement, reducing stress on bones and joints and providing the right level of cushioning and support.

Movements such as walking impact the ground with 100% to 150% of your body weight. To offset this force, flexion is designed to help you move along the CENTER OF PRESSURE – the path of impact along your foot – with less effort and exertion. In doing so, flexion reduces fatigue on the foot and legs and promotes stamina.

FULL-GRAIN LEATHER UPPERS

There's no break-in period required. Flexion boots are comfortable and ready to work right out of the box.

20%

**LIGHTER THAN TRADITIONAL
WORK BOOTS**

when compared to traditional Goodyear welt constructions

FLEXION ENGINEERED CONSTRUCTION

By combining cement and stitched constructions in one unique process, Flexion is the perfect marriage of extreme durability and light, flexible comfort.

CONTOURED LAST

Mimics the shape and contours of foot, providing a sturdy foundation with ample arch support and superior heel cushioning to cradle the foot. The last creates a hammock for the heel to be suspended in, allowing the natural fatty pads in your heel to support your body weight with less effort.

25%

MORE SHOCK ABSORPTION

THAN AVERAGE

Santra shock attenuation test on heel

The vast majority of boots inhibit your natural gait cycle – a serious problem when you consider that workers average 9,646 steps a day, or nearly 4 miles. According to testing at Michigan State University biomechanics laboratory, flexion actually supports you while you move effortlessly through your natural gait cycle.

Less effort means less fatigue. And when workers feel strong and refreshed, they work longer, harder and safer.

CONTOURED MIDSOLE

A sculpted sidewall with medial posting enhances stability and prevents over-pronation.

CONTOURED INSOLE

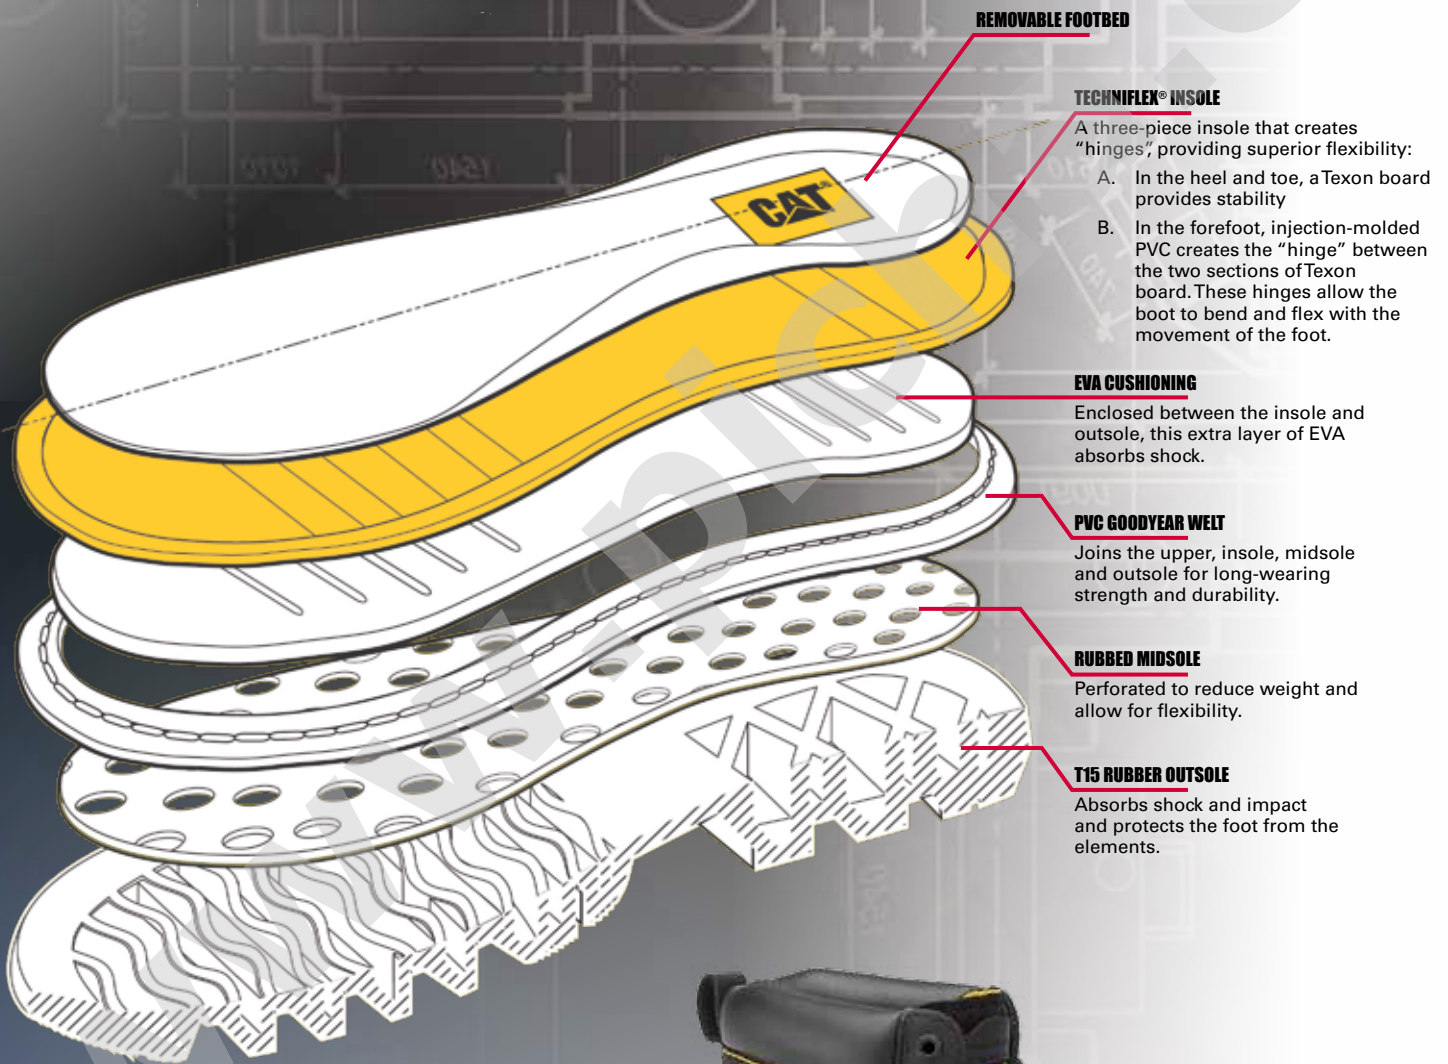

Following the natural shape of the foot, the insole includes perforations along the flex groove channels for underfoot ventilation, enhancing comfort inside the footwear.

OUTSOLE FLEX GROOVES

These ergonomically placed flex groups support a range of motion. Flexion boasts special flex grooves in front of and behind the metatarsal heads, allowing your boot to flex with ease and lighten your load.

**TECHNOLOGY THAT ALLOWS THE
BOOT TO BEND AND FLEX IN KEY
AREAS OF YOUR FOOT, PROVIDING
SUPERIOR COMFORT**

REMOVABLE FOOTBED

TECHNIFLEX[®] INSOLE

A three-piece insole that creates "hinges", providing superior flexibility:

- A. In the heel and toe, a Texon board provides stability
- B. In the forefoot, injection-molded PVC creates the "hinge" between the two sections of Texon board. These hinges allow the boot to bend and flex with the movement of the foot.

EVA CUSHIONING

Enclosed between the insole and outsole, this extra layer of EVA absorbs shock.

PVC GOODYEAR WELT

Joins the upper, insole, midsole and outsole for long-wearing strength and durability.

RUBBED MIDSOLE

Perforated to reduce weight and allow for flexibility.

T15 RUBBER OUTSOLE

Absorbs shock and impact and protects the foot from the elements.

ERGO

ergonomic footwear design

ERGO IS A SERIES OF DESIGN PRINCIPALS THAT WORK TOGETHER TO DELIVER FOOTWEAR THAT PROMOTES FOOT HEALTH BY INTEGRATING STABILITY, FLEXIBILITY AND COMFORT, ENHANCING THE NATURAL MOVEMENTS OF THE FOOT.

ANATOMICALLY-PLACED FOAM PODS, AN ASYMMETRICAL TOPLINE AND A PRONOUNCED ARCHILLES NOTCH FOR ENHANCED CUSHIONING, SUPPORT AND ALL-DAY COMFORT.

SRX COMPOUNDING IN THE RUBBER OUTSOLE PROVIDES SUPERIOR SLIP RESISTANCE.

TRIPLE STITCHED UPPER FOR LONG-WEARING DURABILITY

RUBBER TOE WRAP HELPS EXTEND THE LIFE OF THE FOOTWEAR WITH ADDED DURABILITY.

PRECISELY CONTOURED HEEL AND MEDIAL ARCH AREAS FOR SUPERIOR FIT AND PERFORMANCE-DRIVEN COMFORT, SUPPORTING THE BODY'S NATURAL GAIT CYCLE.

MEDIAL MIDSOLE POSTING HELPS TO PREVENT OVER-PRONATION AND KEEP YOUR FEET PROPERLY ALIGNED.

ANATOMICALLY-CONSIDERED TREAD PATTERNS AND FLEX GROOVES ON THE OUTSOLE FOR ENHANCED FLEXIBILITY WHILE MAINTAINING STABILITY.

SRX HAS BEEN DEVELOPED TO MEET THE NEEDS OF THE SERVICE WORKER WITH BEST-IN-CLASS SLIP RESISTANCE. THROUGH ENHANCED COMPOUNDING IN THE OUTSOLE, SRX OUTPERFORMERS THE COMPETITION AND EXCEEDS INDUSTRY STANDARDS FOR SLIP TEST.

NON-METALLIC HARDWARE IDEAL FOR SECURITY ENVIRONMENTS

TREAD PATTERN PROVIDES MORE GROUND SURFACE CONTACT WHILE CHANNELS PUSH LIQUIDS AWAY FROM THE FOOT, ENHANCING SLIP RESISTANCE

ANTI-BACTERIAL INSOLE

EXTREME SLIP RESISTANCE THROUGH USE OF HIGH-TRACTION MATERIALS

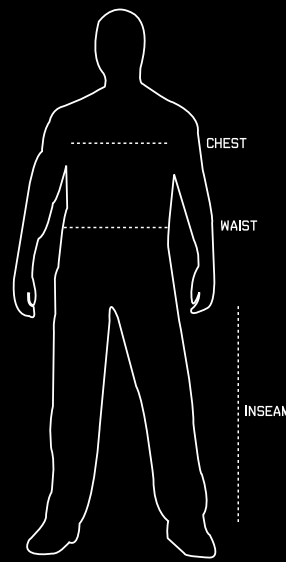

LADDER GRIP TECHNOLOGY HELPS WEARER GRASP UNEVEN SURFACES

**SUPERIOR GRIP WHEN YOU NEED IT
BEST-IN-CLASS SLIP RESISTANCE**

FIND YOUR PERFECT FIT

Take measurements according to the diagram to find your correct size.

CAT® MARKETING SUBMISSION AND APPROVAL

All catalogs, pamphlets, flyers, advertisements, promotional artwork, displays, posters and ad specialty items (essentially all product which is not apparel) bearing the Cat® or Caterpillar® name or trademark must be submitted for concept and production approval.

- All marketing items must be submitted for concept approval. The item submitted will be reviewed to determine if it is in keeping with the brand vision. If the marketing item is in keeping with the brand message, it will be submitted to Cat Corporate for formal concept approval.
- You will be notified with official Cat Corporate comments if the concept is approved or rejected.
- Vendors and suppliers who will produce the marketing item must sign a manufacturer's agreement and it must be updated yearly. This document must be on file and approved before the actual marketing item is produced.
- Following concept approval, you must then submit the actual marketing item. It is important you send three final samples when submitting items for formal production approval from Cat Corporate.
- You will be notified with official Cat Corporate comments if the sample is approved or rejected.
- Please allow 5-10 days for the approval process.
- It is your responsibility to make sure the marketing items produced in bulk are in keeping with the approved sample submitted for production approval.

LOGO GUIDELINES

These guidelines explain and illustrate the use of the Cat logo as it relates to advertising. The Cat logo must be used properly.

Cat Flag Logo Application

The trademark artwork may be reproduced in two color or reverse. For two color reproduction, the yellow field must be matched to the Caterpillar Corporate Yellow. For reverse, the logo may only be displayed as a white logotype with black background.

Color Builds

CMYK (Gloss) 0-29-100-0 CMYK (Matte) 0-23-100-0

Legal Line

The legal line needs to go on all advertising and marketing materials unless otherwise noted.

© 2011 Caterpillar

www.cat.com, www.caterpillar.com

CAT, CATERPILLAR, their respective logos, "Caterpillar Yellow," "Caterpillar Corporate Yellow," as well as corporate and product identity use herein, are trademarks of Caterpillar and may not be used without permission.

Prohibited Uses

- Never create variations or alternate versions of the trademark including, but not limited to, outlines of marks, marks with drop shadows, or gradient color.
- Do not use redrawn or poorly reproduced design marks.
- Do not alter the shape or proportions of the design marks.
- Never display the design mark at an angle or vertically.
- Never use the design mark in any type of animation, or add effects to give the appearance of animation.
- Never combine the trademarks with any other logo, symbol, mark or text.
- Never trivialize the trademark by using repetitively or as decoration.

Other Prohibited Uses

Do not add type to alter the logo

Do not recreate logos

Do not add objects or elements to logos

Do not change box proportions

Do not add screen tints

Follow these Rules for Backgrounds

- Place the flag logo in a corner of the image ensuring that it stands alone.
- Do not combine the logo with any other text or graphic.
- Place the logo over a photograph in an area that provides no visual disruption.
- Always make sure there is sufficient contrast between the logo and the background.

Incorrect placement of logo

Correct placement of logo

SUBMISSION PROCESS

Submit marketing concepts and all related details via an electronic document (pdf, jpeg, eps, etc.) to sales@footsure.net. Any photographs, illustrations and/or samples which help better explain the marketing item should also be sent with the concept. If samples are sent, at least three samples are required.

When submitting concepts for approval, you must provide additional information to ensure your concept is fully understood and also to expedite the approval process.

Anything bearing the Cat® or Caterpillar® name or trademark or anything pertaining to Caterpillar business must be approved prior to production.

Submit Artwork and Items to:

FOOTSURE WESTERN LTD
Units F&G, Quedgeley West Business Park
Bristol Road, Hardwicke, Gloucester GL2 4PH

Send all e-mail correspondence to:

SAFETY FOOTWEAR STANDARDS EXPLAINED

EN ISO 20345/EN 345

- HIGHEST LEVEL TOE PROTECTION
- OIL RESISTANT OUTSOLE
- ALL Cat FOOTWEAR HAS FULLY ENCLOSED HEEL REGION

SB

Impact and compression resistant toe cap tested to 200 joules impact.

S1

As SB with antistatic and energy absorbing heel.

S2

As S1 plus water resistant upper

S3

As S2 with underfoot penetration resistance and cleated outsole

HRO

Hot surface protection, heat resistant outsole to 300°C

P

Penetration resistant midsole tested to 1100 newtons

SLIP RESISTANCE

SRA

Tested on ceramic tile contamination with a dilute soap solution

SRB

Tested on smooth steel contamination with glycerol

SRC

Passes both SRA and SRB slip tests

TM144

Complies with SATRA's criteria on slip resistance testing for footwear on a range of surfaces

TECHNICAL FEATURES GUIDE

BRINGING YOU ON-THE-JOB PERFORMANCE THROUGH ADVANCED FEATURES AND FABRICATORS

STORM BLOCKER PLUS™

Made to withstand the harshest working conditions with ease and comfort. Waterproof, windproof, breathable and seam taped.

STORM BLOCKER™

Garments designed for demanding conditions. Water and wind resistant as well as breathable.

WATERPROOF

Garments made of waterproof fabrics and seam sealed to insure protection from the elements.

WATER RESISTANT

Sheds water in wet conditions keeping you dry longer.

WINDPROOF

Stops wind from penetrating to the body keeping you warm and protected.

INSULATED

Added protection from the cold. Insulated garments help regulate core body temperature when the thermometer drops.

BREATHABLE

Allows air to move freely from the body through the fabric keeping you comfortable longer.

MOISTURE CONTROL

Fabric that wicks moisture away from the skin to the fabric surface creating faster drying time.

STAIN RESISTANT

Added finish that resists stains giving you a garment that looks better and lasts longer.

REFLECTIVE

Materials which are highly reflective in low-light conditions.

ANTIMICROBIAL

Fabric that prevents bacteria and fungi, reducing odors to keep you feeling fresh.
